Special Issue on Drugs and Driving

Contents

HERBERT MOSKOWITZ: Introduction	1
NORMAN B. GORDON: Influence of narcotic drugs on highway safety	3
PAUL M. HURST: Amphetamines and driving behavior	9
MARKKU LINNOILA: Tranquilizers and driving	15
HERBERT MOSKOWITZ: Marihuana and driving	21
SATANAND SHARMA: Barbiturates and driving	27
REGINALD G. SMART and DIANNE FEJER: Drug use and driving risk among high school students	33
M. MAKI and M. LINNOILA: Traffic accident rates among Finnish out-patients	39
HERBERT MOSKOWITZ, SLADE HULBERT and WILLIAM H. MCGLOTHLIN: Marihuana: effects on simulated driving performance	45
PAUL ZADOR: Statistical evaluation of the effectiveness of "Alcohol Safety Action Projects"	51
PENELOPE JOHNSON, PAUL LEVY and ROBERT VOAS: A critique of the paper "Statistical evaluation of the effectiveness of Alcohol Safety Action Projects"	67
Forthcoming event	79

Aims and Scope of the Journal

Accident Analysis and Prevention is designed to provide wide coverage of the general areas relating to accidental injury and damage, including the pre-injury and immediate post-injury phases. Papers may deal with medical, legal, educational, behavioral, theoretical or empirical aspects of transportation accidents, as well as with accidents at other sites. In the interest of reducing secularism in injury control research, the Editors will especially welcome contributions tending to unify the field.

Allied Journals

Other Pergamon Journals which are of interest to readers of *Accident Analysis & Prevention*:
Annals of Occupational Hygiene
Information Processing and Management
Operational Research Quarterly

The following specific topics would be within the scope of the journal: empirical studies of human, environmental and vehicular factors influencing the occurrence, type and severity of accidents; experimental and statistical studies of the effects of countermeasures; modelling and statistical analysis of specific educational, administrative or enforcement programs, and of their acceptability; planning, policy and decision-making; analysis of conflicts between 'safety' requirements and other objectives, including social and public health needs.

Regional Studies
Socio-Economic Planning Sciences
Transportation Research
Vision Research

Each journal has an individual Information and Index Leaflet giving full details. Write now for any of these leaflets which interests you.

Information for Contributors

General

Manuscripts should be submitted in triplicate to the Editor-in-Chief or to one of the Associate Editors. The following approximate areas of responsibility may be taken into consideration in the submission:

Hans C. Joksich: analytic evaluation of road accident countermeasures; economic aspects and benefit-cost analysis.

Julian A. Waller: Medical, alcohol and drug impairment; home and recreational injury; role of emergency health services; product safety.

Frank A. Haight: All areas.

Only papers not previously published will be accepted, and authors must agree not to publish elsewhere a paper submitted to and accepted by the Journal.

English is the language of the Journal.

Twenty-five reprints of each paper will be provided to the author free of charge. Additional copies can be purchased on a reprint order form which will accompany proofs.

Style of Manuscript

Manuscripts should be typed double-spaced on one side of the page only with wide margins, and submitted in triplicate. A short abstract should accompany the manuscript on a separate sheet. Both the paper itself and the abstract should be headed by the name or names of the author and their affiliation. In the case of co-authors, it should be clearly indicated which author is to receive correspondence and proofs for correction. All figures and illustrations should be professionally drawn about twice the final size required. Their position in the manuscript should be indicated, and figure numbers together with informative titles should be listed on a separate sheet of paper.

References should conform to the UNESCO regulations. These are:

1. References are to be listed alphabetically by author at the end of the paper. Works of the same author appear according to the date of publishing. They are not numbered. All references are made up of:
 - A. The surname of the author followed by his given name or initials. If a publication has more than one author the given name or initials of secondary authors precede their surname.
 - B. The title of the publication.
 - C. The abbreviated title of the journal.
 - D. The number of the volume and/or (in brackets) of the issue (only when the issues of a volume are singularly paginated).
 - E. Numbers of the first and the last page of the paper.
 - F. Year of publication. If more than one work of an author is published in the same year, the year should be followed by a small letter: a, b, etc.
2. In case the publication is a book, C, D, and E should be replaced by the name of the editor, the publisher and the place of publishing, respectively.
3. In the body of the text references should be quoted with the year of publication in brackets if the name of the author is mentioned in the text, e.g. [1969]. Otherwise the name of the author is to be set in square brackets, e.g. [SMITH, 1969].
4. If the references mention the names of more than one author, the first mentioning includes all the names up to three, all further mentionings show only the first name with the addition: . . *et al.*

Manuscripts which do not conform to this style, if accepted, are subject to considerable delay pending revisions, since it is not possible to have them typeset until satisfactory copy has been furnished.

Both figures and tables will be photo-reproduced, and authors are required to furnish camera-ready artwork or glossy prints. For guidance on how best to prepare your tables for photographic reproduction please contact the Reprographic Section of your institution which will give you assistance.
